

LOADING & CONTROLS

Commodore 64

To load from disk type LOAD""8 and press RETURN, then type RUN. To load from tape hold down SHIFT and press RUN/STOP. The game is played using one or two joysticks.

Amstrad CPC

Type RUN"EMLYN" and press ENTER. The game is played using one or two joysticks.

Spectrum

Type LOAD "" and press ENTER. After loading choose the controls you wish to use, these instructions assume you are using a joystick.

GETTING STARTED

When the game starts you will see a blank screen with a blue menu bar at the top, and an arrow which acts as a pointer. If you move the joystick the arrow moves. Move the arrow until the GAME option is highlighted, then press the fire button. A menu will drop down; to start a game move the arrow until the PLAY GAME option is highlighted, then press the fire button again - a friendly match between two computer-controlled teams will follow.

If you want to take part in a match yourself you must first become manager of one of the teams - see Edit Teams in the Strategy & Options section. If you want to play against a friend each of you must become manager of a team - then set up a friendly between the two teams.

If you've played a computer football game before you'll already know the basic controls. But for anyone who's playing football on a computer for the first time, here's what you do:

You control one player at a time. The player you are controlling at any particular time is indicated by an arrow above his head (and his name is displayed on the scoreboard or at the top of the screen). If your side has the ball, the player with the ball will be highlighted, unless it is a throw-on, a goal-kick, a corner, or a free kick, in which case you will control one of the players waiting to receive the throw or kick.

When one team is computer-controlled, and the other is controlled by a human player, the computer team always kicks from right to left.

Move the joystick in the direction you want your player to run and hold it in that direction until he reaches the required speed. If you now allow the joystick to return to the central position he will continue moving in the same direction and at the same speed. To slow down move the joystick away from the direction of movement.

To kick the ball press and release the fire button - the length of time you hold the fire button down determines the strength of the kick. All actions which are controlled by the fire button are triggered only when you release the button.

That's all you really need to know to be able to play, but there are many more controls to learn about as you become more confident and proficient. Don't try to run before you can walk, though!

PLAYER CONTROL - ADVANCED TECHNIQUES

Turning

To change direction move the joystick so that it points in the new direction. Of course, as in real life you can't suddenly turn round without losing some momentum. If, for example, you move the joystick so that it is pointing in the opposite direction your player will slow down, turn around, then start running again. You'll find that if you

move the joystick through 180 degrees yourself, going through all the angles in between (ie, don't pass through the centre), you can change direction much more quickly. The same principle applies to other changes in direction. This can give an experienced player a useful edge over a less practised opponent.

SIDESTEPPING & BARGING

When you're trying to dribble past the opposing defenders you'll often want to sidestep to avoid a tackle.

To sidestep move the joystick from the central position at 90 degrees to your direction of movement, and release it instantly (if you hold it too long or pass through the 45 degree angle you'll actually change direction). To barge a player running alongside you use exactly the same control method.

KICKING THE BALL - ADVANCED TECHNIQUES

If you could kick the ball only in the direction you were running it would be very difficult to pass and shoot accurately. Emlyn Hughes International Soccer allows you to control the height and direction of the ball when you kick it - if you wish.

CONTROLLING THE HEIGHT

You can kick the ball at three different heights, determined by where the joystick is positioned when the fire button is released. If the joystick is pointing in the direction that the player is running the ball will stay low. If the joystick is pointing in the opposite direction the kick will be lofted (ideal for lobs and centres), whilst if the joystick is in the central position a 'normal' kick will result, halfway between the other two.

CONTROLLING THE DIRECTION

You can kick the ball in up to five different directions, depending on the options selected before you start playing. If you choose the 1-direction option the ball is always kicked straight ahead. The 3-direction option allows you to kick straight ahead, or at 45 degree angles either side; move the joystick at right angles to the direction you are running after you press the fire button.

The 5-direction option is the most difficult to use, but by far the most powerful, not least because it allows you to kick the ball at angles not otherwise available. You should aim, therefore, to master this method of kicking as soon as possible.

To access the additional directions move the joystick at right angles to the direction of movement. If you let go of the joystick before the fire button is released, the ball is kicked at an angle of about 20 degrees to the direction of travel (ideal for shots); if the fire button is released before you let go of the joystick the angle increases to about 70 degrees (just right for centres, or when you want to pass the ball out to the wing). While the 5-direction option does not give you access to the 45 degree angles you can always change direction just before shooting or passing.

BACKHEELS

To backheel the ball press the fire button and move the joystick backwards (ie, away from the direction you are running), then forwards, while the fire button is held down.

CHOOSING WHICH PLAYER YOU CONTROL

When the player you are controlling is not in a good position to get the ball you will usually want to select a different player. There is an automatic reselection

option, where the computer will decide which player is in the best position, but manual reselection allows experienced players to use their skill to advantage.

To select a player press the fire button, move the joystick in the approximate direction of the player you wish to select, then release the fire button. If there are two players in similar direction the computer may highlight the wrong one - repeat the process until the right one is highlighted.

It is not possible to choose another player when the player you are controlling has the ball (since pressing the fire button would make him kick it), or when he is very close to the ball (in which case pressing the fire button might initiate a sliding tackle or diving header). However, with practice, you will find it easy to change control when you pass the ball from the player who made the pass to the player who will receive the pass - point the joystick in the direction of the pass and press fire.

HEADING THE BALL

To head the ball press and release the fire button. Provided the ball is within range your player will jump up to head the ball. If the ball is too low for a normal header he will automatically attempt a diving header (diving in the direction he is running). A diving header results in the ball bouncing off in the direction of the dive, the direction of a normal header depends on the joystick position at the time the ball makes contact with your player's head - you can select any of 8 angles, so you can flick the ball or head it backwards if you are skilful enough.

SLIDING TACKLES

Sometimes the ball is just too far away for you to trap it normally, or for a normal tackle to be effective. In this situation the solution is to slide towards the ball to gain the added yard of pace that you need. Press and release

the fire button to initiate a sliding tackle (the ball must be too low for you to head it, otherwise a diving header will result). If you come into contact with the ball you may succeed in controlling it, or it may break loose. You may even give away a free kick, especially if you tackle from behind, so take particular care when tackling in the penalty area!

FREE-KICKS, CORNERS & THROW-INS

These are handled automatically. The ball is kicked or thrown to the highlighted player either after a few seconds (the time varies) or when the fire button is pressed and released with the joystick central (if the joystick isn't in the middle it will be assumed you are trying to change players). If the goal is in view the player taking a free kick will sometimes take a shot.

PENALTIES

These can be handled automatically, but if you want to increase your chances of scoring you can take control. Just hold down the fire button (to determine the strength of kick) and move the joystick in the appropriate directions during the run-up, as if you were kicking the ball normally. Of course, if you kick the ball straight ahead the goalkeeper is likely to save it, unless you lob it over his head.

CONTROLLING THE GOALKEEPER

You can choose between controlling the goalkeeper yourself, or allowing the computer to control him. You only control the goalkeeper when the goal is under threat; to make him dive or gather the ball you must press and release the fire button with the joystick central. Any other joystick movements are interpreted as instructions for your highlighted player as instructions for your highlighted player.

When two players are playing against the computer the goalkeeper can be controlled by either player. Automatic control of the goalkeeper is recommended for beginners. It is the timing of the fire button release that determines whether or not the goalie has the best chance of saving the shot.

PAUSING THE GAME

Pressing the SHIFT key (CAPS SHIFT on the Spectrum CBM key on the C64) halts the action at any time during the game.

Press the key again to restart a paused game.

SUBSTITUTIONS/CHECKING FITNESS LEVELS

During a match the fitness of the players steadily decreases, and may go down suddenly if a player is injured by a bad tackle or awkward fall. If you press Q (B on Spectrum or Amstrad) whilst the game is paused and the ball out of play (for a throw-on, corner, goal-kick or penalty) the menu screen will appear. Many menu selections are unavailable during a game or else only take effect when the next game is played.

Select the Pick Team option from the Game menu. This looks exactly the same as the Edit Team screen, but you cannot change anything except the positions. If you decide you do not want to make any changes, exit from the menu and select Play Game to continue the match. If you decide to make a substitution (and provided you have not already used your subs) move the pointer to the number of the player you want to take off and press fire. Now move the number until it is over the number of either substitute and press fire again.

Exit from this screen by moving to the menu bar and pressing the fire button.

MISCELLANEOUS FEATURES

Press SPACE (up arrow on the C64) to skip the sequences where players are running on or off the pitch, or back to their positions after a goal is scored. Press ESCAPE (T on Spectrum or Amstrad. RUN/STOP on C64) to abort the game.

STRATEGY & OPTIONS SECTION

Emlyn Hughes International Soccer offers a wealth of different game options. All of these options are selected using a simple drop-down menu system.

Some items in the menu are followed by a tick or a cross. These are options you can turn on or off pressing fire or the mouse button. Others display values (or sometimes colours) that you can change moving the joystick left and right mouse buttons). Move the pointer to the option you require and press fire to select it.

Sometimes menu options will be shaded or in a different colour. These are options that are not available at a particular time.

CHOOSING YOUR SQUAD

The Edit Teams screen is probably the most important in the strategy section of the game. It allows you to decide who you want in your 16 -man squad for the current season (once the season begins you cannot change any of the squads).

To change the player names move the pointer to the first name you want to change and press fire. Simply type over the old name and press ENTER when you have finished entering the new name (press CLR/HOME on C64, ST, or Amiga to clear the old entry).

The "Played by" entry denotes whether the team is computer-controlled or controlled by a human player. Any entry other than COMPUTER gives human control.

Normally you should enter the name of the person who controls the particular team.

PICKING TEAMS

You can pick your team using either the EDIT Team or Pick Team options (although during a competition only Pick Team is available). Suppose that you want to drop a player, say number 7, and replace him with a player not currently in the team. Move the pointer to where the number 7 is displayed and press the fire button to pick up the number. Now move the number up or down the column to where the replacement player is, and press the fire button to drop the number 7 against his name.

If you allocate a new shirt number to a player who already has a number you automatically pick up his number, which of course you must allocate to another player. Numbers 12 and 14 indicate the two substitutes.

PLAYER SKILL FACTORS

Each player (except for the goalkeeper) has three skill factors, Running Speed, Defensive Skills, and Attacking Skills. Each skill can be at three different levels, indicated by the number of blue buttons that are lit up the more buttons that are lit the better the skill level. To change the skill levels move the pointer to the appropriate button and press fire - the number of buttons lit will cycle from 1 to 2 to 3 and back to 1 again.

FITNESS LEVELS

At start of a season all players are fully fit, but during each game the fitness of those players who are playing declines below 75% will start to play well below their normal standard of skill, and you may need to substitute them. Sometimes you may decide to take a chance and play one of your star players even though he is unfit it may pay off, but it could also be a disaster.

Fitness levels will normally increase in the week between matches, but you may find that players need to be rested for a week or two to regain full fitness. Fitness levels are not taken into account in friendly matches or when Equal Skills is selected, nor do they change during the game - in other worlds players play as if they were fully fit during a friendly, but at the end of the game their skill level will be unchanged.

EXISTING AFTER EDITING TEAMS

When you have finished editing the team move the pointer to the menu bar, then press the fire button (on the C64 'double-click' on a blank area of the screen by pressing the fire button twice in quick succession). This will display a box with three buttons. Move the pointer to the ? button and press fire if you exited by mistake; move to the X button and press fire to exit from editing without any changes being made (ie. if you have made a mess of things!). Press fire when the pointer is on the button marked with a tick if you are happy with the changes you have made.

COMPETITIONS

There are three options a league in which all 8 teams play each other once or twice (depending whether the Home & Away option is selected), a Cup which is a knockout competition between 8 teams, and a Season which gives two separate competitions, a league and a cup.

When you start a competition any competition already in progress is abandoned, so if you wish to play both a Cup and a League you must use the Start Season option. If you want to start a new competition and continue the existing one at a later date use the Save All function to save the start of the competition.

SAVING THE GAME

The save All option under the Game Menu saves not only all the fixtures and results to date, but all the team details including names, skill levels, and fitness levels, together with the current settings of the various options. Save Team records the data for a particular team only, not option settings, results or fixtures.

DO NOT ATTEMPT TO SAVE ANYTHING TO THE PROGRAM DISK OR TAPE. YOU MUST USE ONE OF YOUR OWN DISK OR TAPES. REMEMBER ALSO THAT YOU MUST LOAD THE PROGRAM BEFORE ATTEMPTING TO RELOAD AN UNFINISHED GAME.

If you are using an Amiga or ST the files must be saved to as specially formatted disk. First format a blank disk in the usual way, then use the Make Data Disk menu option to turn it into a data disk.

OPTIONS MENU

Duration - Each match can last up to 90 minutes (plus extra time)

1 or 2 v Computer - One or two human players can play against the computer.

Extra Time - Extra time can be played if a Cup game is drawn. Otherwise a replay is necessary.

View C vs C - Matches between two computer teams can be viewed, or not.

Home & Away - In a league competition teams can play each other once or twice. If they play twice, then each team plays away once, and at home once.

Practice - In practice mode the computer-controlled opposition stays in its own half and only offers the minimum of interference. Use this mode to practise the controls.

Skill Level - There are 10 different skill levels for computer teams. These skill levels are in addition to the individual player skills.

Equal Skills - If you prefer, all players can have the highest skill levels.

Backheels - Backheels can be allowed or disallowed.
Kick Direction - You can choose to be able to kick in 1, 3 or 5 directions.

Auto Goalie - The goalkeeper can be controlled automatically or manually.

Auto Reselect - Reselection of players can be manual or automatic.

Points for win - In a league either 2 or 3 points can be awarded for a win.

Substitutes - Either 1 or 2 substitutes are allowed

COLOURS MENU

On the ST and Amiga you can design the strip that each team wears. To assign a colour click on the colour, then on the box alongside the part of the strip you wish to change. To change one of the selectable colours double click on the colour, then adjust the R, G, and B sliders. Change the flesh tone by clicking on the colour you require. On the Amiga you can choose a national flag or rosette for each team - click on the arrows to make your selection, then, if you have chosen a rosette, set the colours in the same way. On the Amstrad the following colours can be changed;

Pitch Colour - Initially green; also used as a shirt colour

Line Colour - Initially white; also used as a shirt colour

Flesh Colour - Initially pink; also used for stripes on shirts

Shorts Colour - Usually black; also used for players hair, boots etc.

Goalie Colour - The goalie shirt colours can be swapped with one of the teams

On the C64 you can also change the ball colour; the player shirt colours are set using the Team Colours

option in the Game menu. On the Spectrum there are only two colours, but either can be changed!

GAME MENU

The following selections are available:

Play match - This starts the game shown at the bottom of the screen.

Arrange Friendly - You can arrange a friendly match between two teams at any time. Move the pointer to the Home team and press the fire button, then choose the Away team similarly.

Postpone Match - If the human(s) supposed to be playing in the next match is not available the match can be played at the end of the current week's fixtures.

Start Cup - Starts a knockout competition with 8 teams.

Start League - Starts a league competition with 8 teams.

Start Season - Starts a season in which both a league and a cup are played.

Edit team - You can change the names of the teams and the players, also their skill levels. However, these cannot be altered once a competition has started

Team - This shows which team is currently displayed; move the joystick left or right or use the mouse buttons to change to a different team

Load Team - A team saved to tape or disk can be loaded.

Save team - A user-created team can be saved.

Load All - Restores the state of the game previously saved with Save All.

Save All - Saves all the team data, fixtures, results, colours, options etc.

DISPLAY MENU

The following displays can be selected;

Show Teams - A list of the 8 teams is displayed with their Managers (ie. human player or computer).

Show Players - A list of the players in a particular team is displayed.

Team - Identifies which team is displayed.

Show Fixtures - Displays the fixtures for a particular week or team; change the team/week to the one you require.

Show Results - Displays the results for a particular week or tem; change the team/week to the one you require.

Show Table - Shows the league table.

By Team - Results/fixtures displayed by team....

By Week - or by week

Week - Which week is displayed.
