## MOUNTIE MICK'S DEATHRIDE

O.K. Mick (that's you!) it's time to try your luck on the Iron Horse, no soft saddles on this one though so button up your jacket and prepare for the train ride of the century!

Assuming you've read the back cover you should already be lining up the McCluskey boys in your Smith and Wesson so it's time to load the game. (The instructions are on the label).

Right, so here you are on the roof of a thundering great train with hosts of baddies shooting at you. Sounds difficult? It gets worse! Some of the baddies have found grenades, but never fear, there are some lying around for you as well. Now Mick is a plump fellow (too much good ol' Canadian cooking!) and if he goes and jumps on anyone they end up flatter than a pancake.

There are two more problems as well, the first is leaking gas tanks, one whiff and you're a gonner. Don't panic there are gas masks around, don't forget to put them on when you see danger. Secondly there are tunnels and again help is at hand in the form of a torch, but conserve your batteries as they don't last for ever.

Just to add to the fun there are nine trains travelling on this route and the only way to catch up with the next one is on a hand cart. This just so happens to be being pushed along in front of the train. Jump on and start pumping, don't thrash it, you should build up speed slowly.
