

Instructions for Saint Dragon

On a far distant planet you must prepare to fight the final battle!

An evil force of monster machines has risen to conquer the Galaxy. One by one the peaceful races of the Galaxy have been attacked and enslaved by the Cyborg Monsters. None has the strength to stand against the power of the Cyborgs, until one lone rebel rises from within the ranks of the mechanised monsters.

Part dragon, part machine, the Cyborg Warrior fights back against its tyrant masters. The Galaxy has a Hero. Hope returns to the hearts of the people at the rise of the Armoured Champion they call, "SAINT DRAGON".

In this reverse of the Saint George legend you must fly the Armoured Dragonship through five levels of non stop destruction. Choose between fireballs, bouncing bombs, ring lasers and turret weapons to blast your way through the armoured pumas, mechanical cobras, giant cyborg bull and a host of other mutant machines. But remember fire power isn't everything! Your ship has an armoured tail. Use it well and you may just survive.

Loading instructions & controls

ST/Amiga

Insert the disc in drive and turn on your machine. The game will load and run.

Controls – Plug Joystick in port 1 (Atari ST) or port 2 (Amiga). Press fire on the joystick or keyboard to start.
