

Count with OLIVER

This cassette contains two programs; **Toyshop** and **Lollipops** recorded in this order on side A and in the reverse order on side B.

You can avoid long waits by choosing which side of the tape to use. If you have a tape counter on your tape player you can use it easily to locate the programs on each side of the tape, if you note the readings at the start of the programs, having first set the counter to zero at the tape start.

Loading the Games

To load Toyshop:

- type `LOAD "TOYSHOP"` and press `ENTER`
- press `PLAY` on the cassette player.

To load Lollipops:

- type `LOAD "LOLLIPOP"` and press `ENTER`
- press `PLAY` on the cassette player.

If the next program on the tape is the one you require, it is sufficient to type `LOAD ""` instead of the program title.

Do not press `CAPS/SHIFT` and `BREAK` together at any time as the program will crash and you will have to reload.

Playing the Games

Both programs start with a demonstration loop. If no key is pressed, the game will proceed with imaginary answers. Once a key is pressed, the game will restart with unlimited time for answers.

Oliver introduces himself and asks "Will you help me get some toys?" or "I like Lollies, do you?" Any key will start the games.

All questions in the rest of each program require numerical answers only. Each time a question is asked the player is required to enter the correct number using the number keys. Two tries at each answer are allowed. The games do not progress in difficulty until a correct answer is given.

In Lollipops the answers to the sums require double digits when playing the game through a second time in the same session.

The sound can be switched off in both programs by pressing `S`. Pressing `S` a second time will restore the sound.

Have you got problems loading the program?

1. Have you remembered to press `ENTER`?
2. Has the cassette been fully re-wound?
3. Are your tape recorder leads connected properly? Refer to your computer's user manual.
4. Check the volume level of your cassette recorder. Is it correct?
5. Please check that you have followed all equipment and loading instructions very carefully.
