#### SCIENTIFIC UNIT

THE VOID IS A GRAVITATIONAL ANOMALY THAT INDICATES A SPACE-TIME DISTORSION LOCATED BETWEEN THE TANTALUS AND MACINELLIC SECTORS

GRAVITON PARTICLES AFFECTS THE NAVIGATION SYSTEMS OF ALL TYPES OF SHIPS CAUSING THEM TO LOSE CONTROL AND BE ABSORBED BY THE SINGULARITY WHILE ARE BEING DESTROYED AT THE MOLECULAR LEVEL

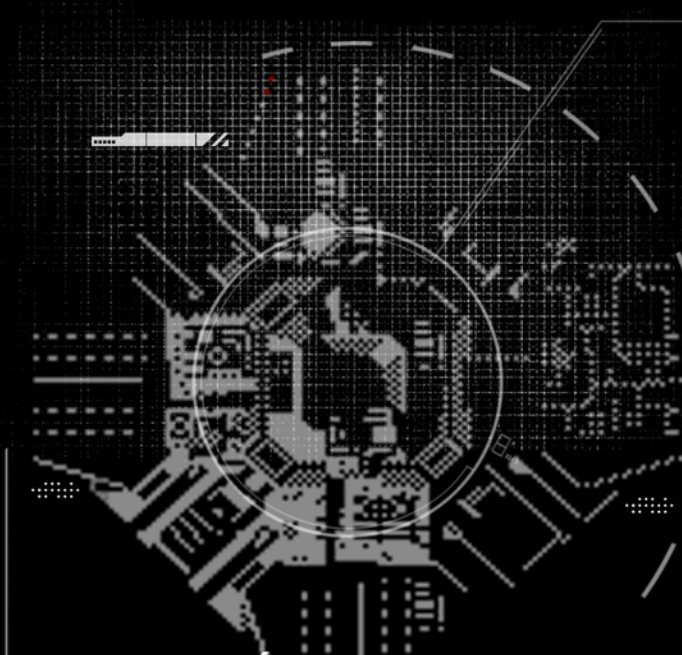

SPECIFIC INTELLIGENCE REPORTS THAT THE VOID CAN HIDE LARGE MASS OBJECTS SUCH AS AN ASTEROID OR A DWARF PLANETOID.

TRAVELING IN TAUSPEED IS IMPOSSIBLE AND ANY SHIP TRAPPED BY THE GRAVITATIONAL FIELD CAN FALL INTO THE ANOMALY.

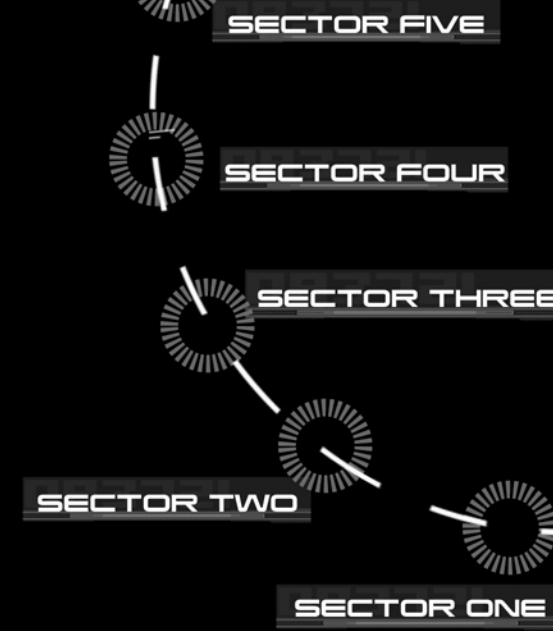

\*\*\* ANY SHIP IS ADVISED TO STAY AWAY FROM THAT SECTOR \*\*\*

### FED . DATABANK - THE VOID

#### SCIENTIFIC UNIT

THE STRUCTURE LOCATED ON THE SURFACE OF THE PLANETOID HAS THE CONFIGURATION OF A HIGH-TECH BASE, THE TAU ENERGY EMISSIONS ARE OUT OF SCALE

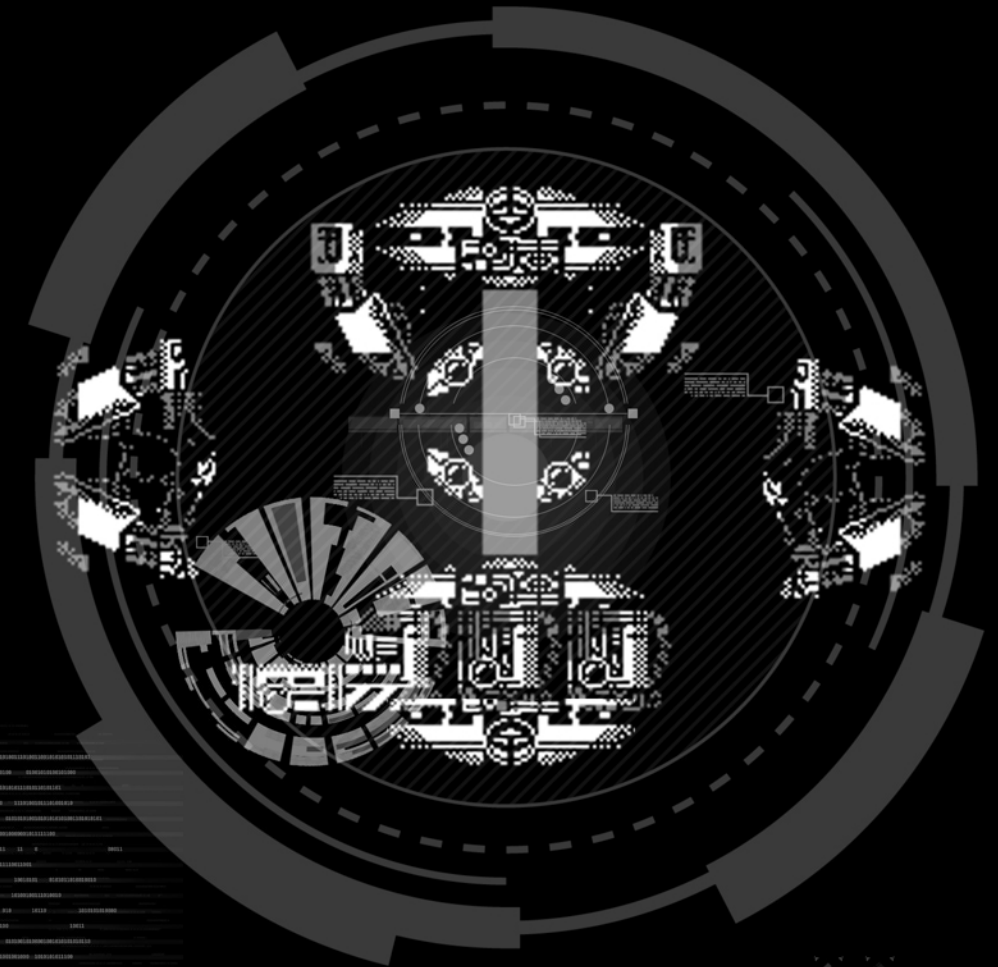

THE LANDING SITE IS FAR FROM THE COMPLEX ENTRANCE, YOU MUST CROSS A DESERT AREA AVOIDING THE PATROLS AND USING THE TELEPORTATION DEVICES TO MOVE FROM ONE SECTOR TO ANOTHER

ALERT

THE MAIN POWER CORE

THE MAIN ENERGY CORE PROVIDES POWER TO THE ENTIRE INSTALLATION OF THE PLANETOID , YOU MUST DESTABILIZE THE CONTAINMENT FIELD

THE SECURITY SYSTEMS OF THIS LEVEL ARE REINFORCED WITH HIGH-POWER SHIELDS, THE WEAPONS OF THE EXOSUIT MAY NOT BE ENOUGH.

#### TERRAN EXODUS

In the year 2077, the Solar System was the new frontier for an overcrowded, exhausted, and nearly desperate Earth. After 20 years of planetary engineering, the mankind had settled many colonies across the solar system, mining resources through mega-corporations.

In 2187 a coronal mass-ejection from the sun reached Titan and a signal of unknown origin was detected beneath its surface. Under the moon jagged, parched and hellishly surface, a buried secret that held seemingly infinite promise. Someone had come and gone before humans set foot on Titan. This moon was criss-crossed with tunnels carved out of the earth's interior, a network of advanced high technology society. The vanished aliens were a source of intense curiosity and hope for the nearby Moon inhabitants of Earth.

Wave after wave of exobots descended into the alien tunnels have been left behind by the so-called "The TAU"

Many technologies are developed using knowledge of the TAU vaults. It is discovered that the ancestry of the sun indicates an artificial origin. The government of Earth has 300 years to prepare the evacuation of the population to Olympus Star Cluster - 30000 light years from our planet. All ships capable of TAU-wave propulsion have been requisitioned, and all space yards are working to full production. The terra mappers and colonizers are being prepared. Agricultural lands and recreational areas are being prepared.

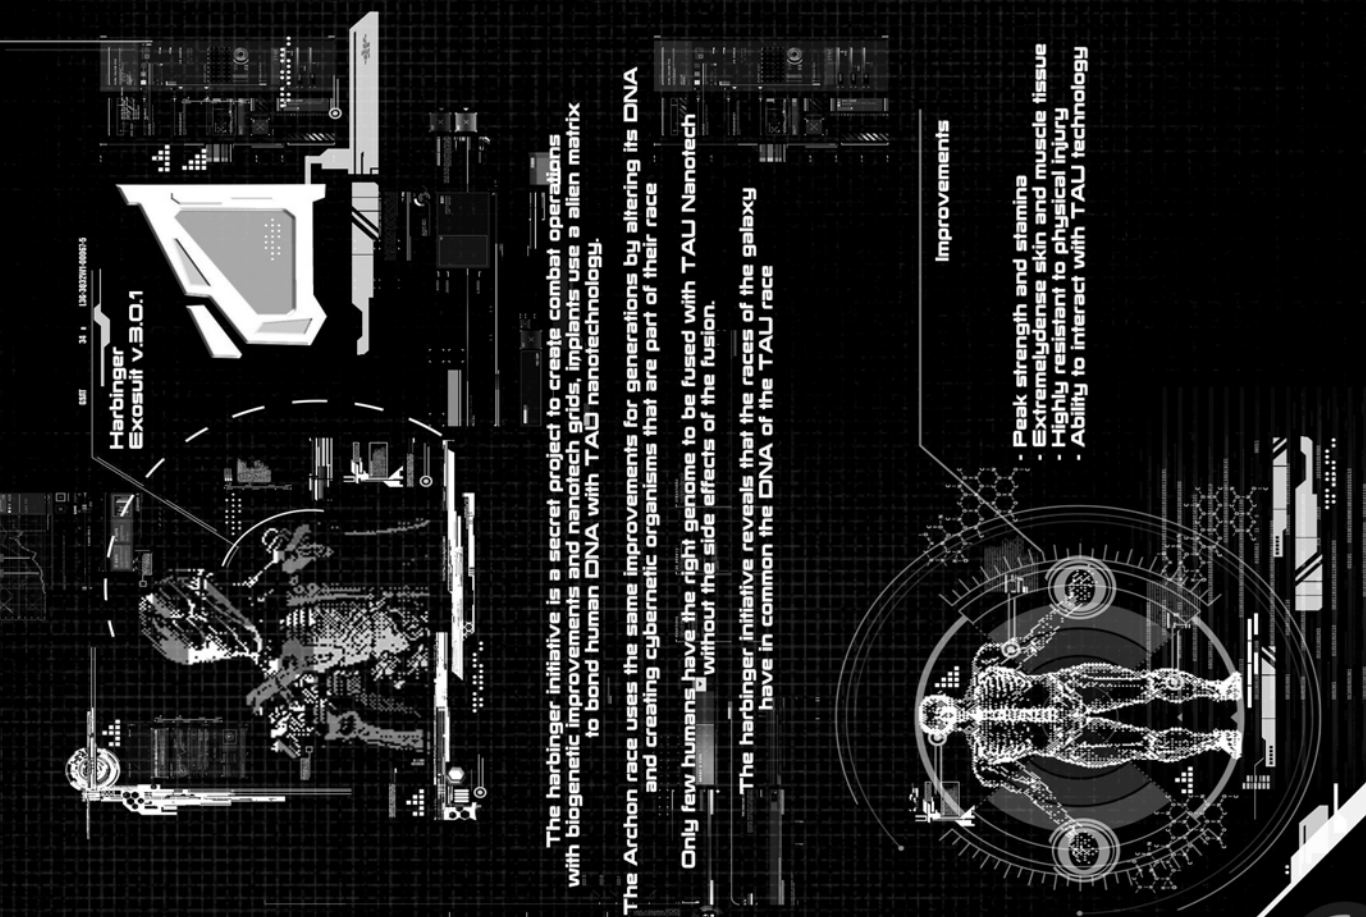

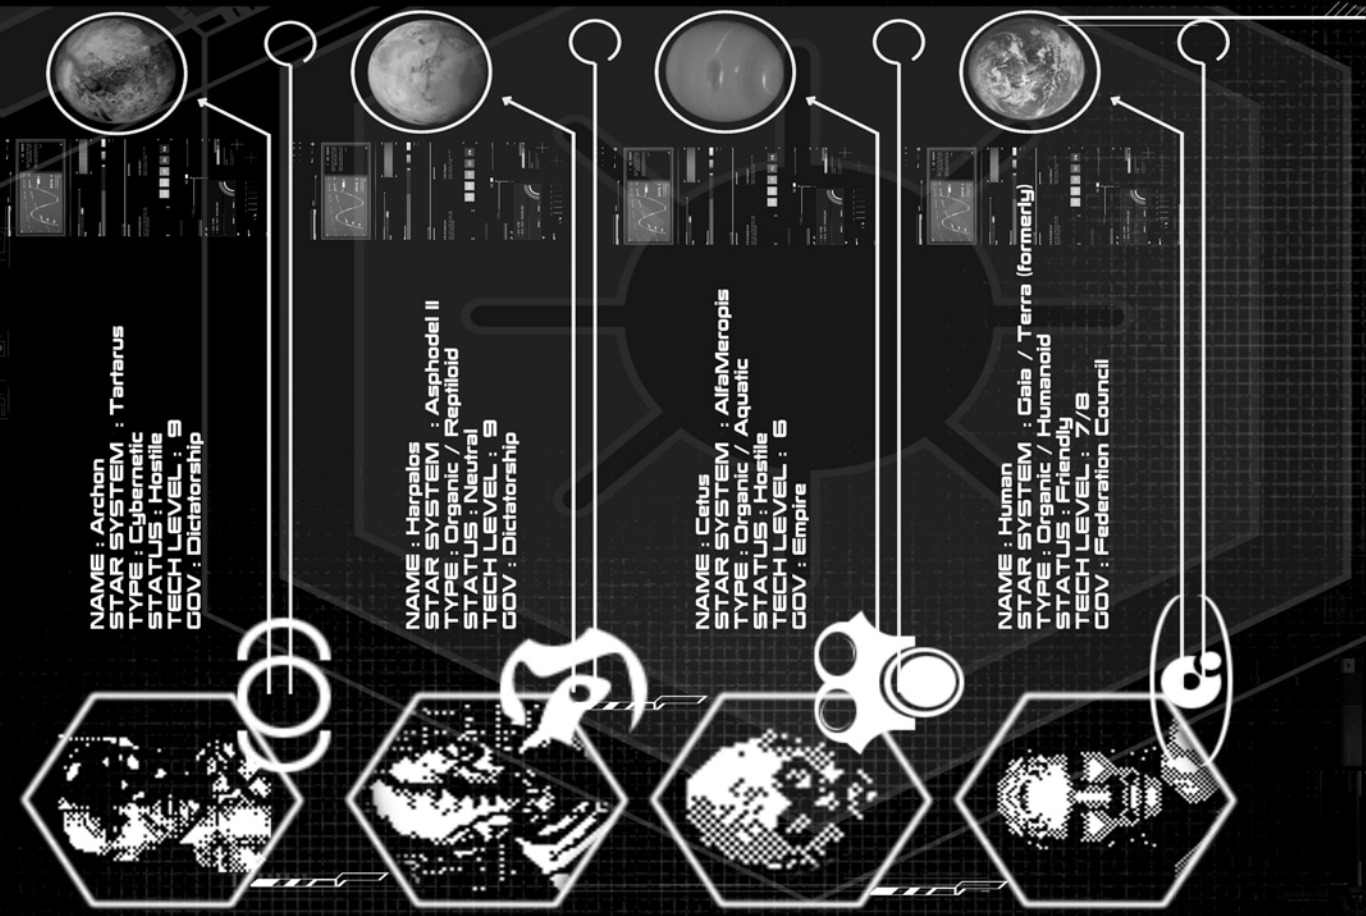

Weeks before the supernova the fleet is heading towards a wormhole near a TAU beacon to travel to the other side of the galaxy.

The Fleet arrives at Olympus Star Cluster and begins the colonization of the primary solar system, the federacion agrees to name the new system, Omega Cluster.

#### CREDITS

Este juego está dedicado a mi primo David Calero Cairós, por ser el ejemplo de que la fortaleza se demuestra ante los obstáculos de la vida con valor y fuerza.

Eres un auténtico combatiente en una batalla difícil contra un enemigo implacable pero que tarde o temprano caerá derrotado ante tu coraje.
